A New Opportunity

The old saying, "If you always do what you've always done, you'll always get what you've always got", rings loud and clear in today's water treatment industry.

Never before has there been so little new innovation in the industry..... until now.

The Hanish Group has developed ground breaking technology so over the top in terms of function alone, that it cannot be matched on any level.

Water softeners, and reverse osmosis, systems are yesterday's technologies. They waste water, salt and electricity. They are large, cumbersome, difficult to install and service.

Our components and systems are a breakthrough in technology, design, and function. In many cases, they waste no water, and use no salt, or electricity.

In every industry, there is always room for improvement, innovation, and change. The Hanish Group proudly represents just such change.

Welcome to the best this industry has to offer.

Welcome to The Hanish Group.

Change Is Coming To The Global Water Treatment Industry, And The Hanish Group Is The Tip Of The Sword.

Our technologies and systems integration are pushing the envelope with regard to new and more efficient methods of water treatment. But it's not just change alone that you need to be worried about. Rather, it is the rate of change, and The Hanish Group is increasing the rate of change.

Industry Disruptive Technologies!

The Promise Of Innovation

At The Hanish Group we never stop thinking about new ways to treat water. With over 300 years of collective design and engineering experience, we have what it takes to think outside of the box with regard to innovative and efficient methods to treat the water on this planet. This is a never ending task for us as a company, and a people dedicated to one goal,,,,, INNOVATION!
